TEXA OFFICIAL SUPPLIER OF THE BMW GROUP

BMW recommends TEXA's KONFORT 770S aircon service equipment to its workshops for air conditioning maintenance.

TEXA receives yet another confirmation of the quality of its products: it has now become an official supplier of the BMW Group. The KONFORT 770S aircon service equipment, specifically developed based on the needs and requirements of German manufacturing companies and designated for the recently introduced refrigerant R1234yf, after a strict series of tests, has in fact gained the utmost appreciation from the technicians of BMW for its efficiency, quality, and assistance.

Having obtained such important recognition, the KONFORT aircon service equipment can now boast of having the approval of virtually all the vehicle manufacturing companies that use the new ecological refrigerant that complies with European Community standards.

Presented at the International Show in Frankfurt in 2010, the KONFORT line of aircon service equipment, which includes an astonishing six models, has been able to maintain its hold on the international market, also thanks to advanced technological solutions, protected by several international patents. The 770S version, in particular, is serially equipped with a sophisticated refrigerant identifier that checks the purity of the refrigerant, preventing harmful gas contamination, and thereby guaranteeing the operator maximum safety.

The KONFORT stations are manufactured in Northern Italy, in a state-of-the-art establishment with automated systems, a guarantee of the highest level of quality and reliability.
